South River Technologies Reports Record Growth in Asian Market Sales

ANNAPOLIS, MD – January 31, 2006 – South River Technologies announced today that it has experienced record sales growth within the Asian market in 2005. SRT saw sales climb in China, Hong Kong and Korea with the most significant numbers appearing in Japan where orders increased a record 60%. SRT has been steadily increasing the number of OEM and reseller partnerships throughout the region, resulting in significant sales growth within the past year.

Japan-based Marron Craft, Inc., SRT's top reseller in Asia, has been one of the major catalysts behind the 2005 growth. Marron Craft's sales grew by more than 72% over their 2004 sales. "In 2005, South River Technologies' products sold extremely well in the Japanese market. As the exclusive distributor in Japan, we are very proud of these sales results," claims Matsusaburo Tsukuda, Managing Director of Marron Craft, Ltd. "With the positive outlook for Japan's economy this year, we expect even greater success in selling the innovative products from SRT."

Forming OEM and reseller partnerships continues to be a key part of SRT's success throughout Asia. SRT formed a strategic partnership with integrator, Macroview Telecom Limited, who assisted SRT in completing a major OEM agreement with Hong Kong Broadband Network (HKBN). Macroview delivered a localized WebDrive solution in Chinese Mandarin, enabling HKBN to provide secure file access and storage service to its customers.

About South River Technologies

Founded in 1996, South River Technologies develops file management software for file collaboration, shared access and website management. The SRT family of products provides strong security for encrypted data transfer. SRT's unique client technology, commercially available as WebDrive®, integrates into the Windows environment, creating an instantly familiar interface for users -- ultimately reducing training and support costs. Independent software vendors license SRT technology to offer added functionality to existing product suites.
