

South River Technologies' CEO Featured on Boys and Girls Clubs' Radio Show

CEO and Co-Founder Michael Ryan Interviewed on Club Tech Radio Now on WNAV

ANNAPOLIS, MD -- April 18, 2011 -- South River Technologies, Inc. (SRT), an innovator in secure managed file transfer (MFT) and file collaboration software, was recently featured on The Boys & Girls Clubs of Annapolis & Anne Arundel County's (BGCAA) new radio show, Radio Now. This program, which airs on WNAV 1430 AM each Sunday morning at 9:30am, allows students to write, produce, and host their own 30-minute radio shows featuring interviews with members of the local community, while also learning about technology.

CEO Michael Ryan was interviewed about his personal experiences in the technology industry, such as early interest and education, as well as about the activities of South River Technologies and his role in the company. It was an easy decision for Ryan to take the time to participate in the program, since he is passionate about technology education.

"I had a blast today being interviewed by Dillyn (with her purple and pink Chucks). It was the first time she had interviewed anyone and she was awesome," said Ryan after his interview. "I believe it's really important to encourage young people to pursue careers in technology, and understand the options that are available to them."

The complete interview is available at <http://tinyurl.com/2wlzbj7> under "techtastic."

About South River Technologies

South River Technologies develops secure managed file transfer and document collaboration solutions that enable customers to protect file transfers, secure their email and collaborate on documents securely. More than 70,000 customers in 120 countries use SRT's software for secure file access and collaboration. For more information, visit www.southernrivertech.com.
